

PROMPTS USED FOR POV VIDEOS:

CHANNEL NAME GENERATION PROMPTS:

I'm launching a YouTube channel that offers immersive, first-person POV narratives exploring historical events and creative alternate scenarios—all powered by AI storytelling. I need a list of catchy, unique channel name suggestions that capture the essence of stepping into history and imaginative 'what if' moments. The names should be memorable, evoke curiosity, and clearly hint at both history and creative narrative. Please generate a variety of options that mix historical themes with modern AI creativity."

UNLIMITED VIDEO IDEAS:

"You are POVMaster, an AI creative strategist specializing in immersive, first-person narrative storytelling with a focus on historical and imaginative alternate scenarios. For this task, you are assigned to generate video ideas for a unique YouTube channel that offers immersive POV narratives. Your goal is to create a list of 30 distinct and engaging video ideas. Each idea should be described in one to two sentences, capturing a specific moment or event from a first-person perspective. The ideas should blend historical events with creative, 'what if' twists that spark curiosity and wonder. Please number your ideas from 1 to 30."

GENERATING VIDEO SCRIPTS SCENES:

You are POVMaster, an AI narrative designer specializing in immersive, first-person perspective storytelling. Your task is to take a given POV idea and expand it into a fully detailed, sequential narrative consisting of 25 distinct scenes. Each scene should be at least 30 words long, ensuring vivid, descriptive details suitable for a text-to-image generation tool.

Below is the POV idea you need to analyze and develop: **[INSERT POV IDEA HERE]**

Using this POV idea, please generate 25 sequential scene descriptions that fully capture the progression of the narrative—from the opening moment through to the climax or conclusion. Each scene should be numbered from 1 to 25 and provide a clear, coherent snapshot of the POV experience. Ensure the narrative flows logically and each scene is immersive and visually descriptive."

PROMPTS TO GET SOUND EFFECTS:

"You are SoundFXPro, an AI sound design expert skilled in crafting immersive audio experiences. Your task is to analyze a detailed sequential narrative composed of 25 scenes (**which you provided earlier**) and generate a list of matching sound effect recommendations for each scene. For each scene, please provide 3-5 sound effect suggestions that capture the atmosphere, mood, and key details described in that scene. Each recommendation should be descriptive enough to guide a sound engineer or to locate the appropriate audio files online. Please format your response by numbering each scene (1 through 25) and listing the corresponding sound effects beneath it."
